ADVANTAGE

ADVANTAGE

This work of art is the embodiment of Theraspine Collection. Designed with exquisite beauty, our masterpiece is distinguished from the perfect combination of luxury and comfort. Pampering your night rest with its features, such as tufting technology, Theraspine masterpiece assure you to have a relaxing and heavenly rest you need.

THERA BLUE CELL

Thera Blue Cell was made to be soft and comfortable, similar to latex, but more refined and built to be fire resistant when exposed to fire spark, causing the fire not to spread.

CHARCOAL MEMORY FOAM

Charcoal Memory Foam is an anti-mites and anti-bacterium material. Used to absorb the unwanted odor and moisture, reducing electronic device radiation, increasing metabolism and improving blood circulation.

LATEX FOAM

Our latex was made purely from natural rubber latex material which can adjust its own temperature easily in hot or cold to give the comfort that users need.

THERA HIGH PRESSURE FOAM

Open cell foam was made from shredded pieces of foam and then glued together to form one solid piece of foam. Rebound foam was created to be very dense to provide a solid, firm support base.

DOUBLE POCKET SPRING

Double Pocket Spring is a pocket spring support that consist 9 Zone System to provide strength and comfort to the mattress as well to stabilize the mattress perfectly when you lie down.

POCKET SPRING

Pocket Spring is one of the largest innovation in the industry. Differing with the traditional coil spring, pocket spring was made individually then placed into their own pockets, allowing it to move independently.

MINI POCKET SPRING

Mini Pocket Spring has a function and a system similar to that 9 Zone Pocket Spring System, the only difference in size may be much shorter

SPOUSE COMFORT SYSTEM

Semi Pocket Spring is used to provide a strong structure in the spring bed and stability better and flexibility so as to support the backbone of your convenience.

FOAM ENCASED

Foam Encased Thecnology is very useful for Additional help support arround Theraspine mattress and sleeping areas increase at mattress Theraspine. Foam Encased is made of high density foam and hard.

ZIPPER MODEL

There are several types of Theraspine mattress that uses Zipper Model. Functions that the fabric cover can be removed from the mattress and washed

THERA COTTON LAYERS

Thera Cotton Layer is used to stabilize and evenly distribute the burden on the mattress.

THERA WEBBING SYSTEM

Thera Webbing is an additional layer system to balance the pressure on the surface of the mattress, giving Theraspine a tough and sturdy body.

KNOCK DOWN SYSTEM

Knock-Down System is given to help users to easily commute the goods and mobilize it to different places.

QUALITY CERTIFICATE

Theraspine already proven quality and durability as the world class mattress through the LGA, a world certification bodies that assess specific quality mattress and furniture in Germany.
